**QUALITY EDUCATION AND FUTURE PLANS**

At I.T.S- The Education Group, our systems are strong on teaching – learning processes. Full time dedicated faculty and the Advisor - Advisee relationship helps the new entrants to evolve as professionals through course work, case methodologies, field visits, networking, industry interface, small group activities and personality development programmes. Effective infrastructural support in the form of library, computer lab, wi-fi enabled campuses, auditorium, seminar rooms, Clinics, Labs, Workshops and Research facilities aid to a well rounded development. We are looking for opening new vistas in the form of new courses leading to I.T.S becoming a deemed university and more foreign collaborations to expand the canvass.
